

Name: Jeffrey Reed Richens

Office: Carbon County School District

District: District #3

e-mail address: jeffprwid@emerytelcom.net

website: none

age: 46

Occupation: Utility Manager

Residence: Price, Utah

Years at residence: 22 years

Qualifications: I have been employed by the Price River Water Improvement District for the past 24 years and have seen how government can and should work for the best results of their customers. I have supervised many of the employees and through education and training have learned how to promote a good working environment while receiving the best that each one has to offer.

My four children have all attended and continue to attend the various schools throughout the District, even Pinnacle Canyon Academy. I myself started at the old Reeve's School and attended Carbon School District through High School. Again, I have seen many good things and some things that could be improved upon. My wife, Amy and I have been involved for many years as volunteers at various schools through Science Fairs, PTAs, sports, water education, etc. We have been pleased with the education our children have received and believe that positive involvement by parents and caring adults will always make the education system stronger.
